

What is the carbon footprint of 'just in case' prescribing?

* prescribing 10 ampoules of morphine sulphate, midazolam, glycopyrrolate, and haloperidol
emissions from waste incineration not included

Calculated using: carbon footprint (kgCO₂e) = activity or resource use x greenhouse gas emissions (GHG) factor

2021 GHG emissions factor for Pharmaceuticals: 0.127682 kgCO₂e/£
