

5 STEPS TOWARDS GREENER PALLIATIVE CARE

STEP 1: GET TOGETHER

Does your organisation have a Sustainability Officer or Group? Join it, or get management support to set one up if it doesn't exist! Where does your department fit in? Make Palliative Care part of the conversation.

STEP 5: SHARE AND CELEBRATE!

Start back at number 1 and make your next sustainable change!

STEP 4: PLAN A QI PROJECT

Where could you make a change with a sustainable impact? Check out the Centre for Sustainable Healthcare training on sustainable QI: <https://sustainablehealthcare.org.uk/susqi>

STEP 2: PUT SUSTAINABILITY ON THE AGENDA— LITERALLY

What is specific to how you deliver Palliative Care that could change? Use team meetings to focus on sustainability- people will have ideas.

STEP 3: MAKE A SMALL BUT VISIBLE CHANGE

Getting rid of plastic cups or adding plants seems like a small thing, but it's a way to start working on sustainability with all your colleagues- the green ball will start rolling.
